

MANISH UKIRADE

Senior ML & AI Engineer | Full-Stack | Cloud & Compliance

Thane, India • +91 86919 83106 • ukirdemanish9797@gmail.com • manish-port-folio.vercel.app

PROFESSIONAL SUMMARY

Senior ML & AI Engineer with 6.7+ years of production experience building Generative AI systems, RAG pipelines, conversational AI platforms, and enterprise-grade SaaS products. Proven track record of owning full product lifecycle — from architecture design and LLM integration to cloud infrastructure, DevOps, and enterprise security compliance. Led SOC 2 Type II, CyberCube, and VPAT certifications independently. Experienced across Azure (deep), GCP, and AWS. Specialised in NLP, Prompt Engineering, and MLOps with hands-on experience deploying LLM-powered applications at scale across HR Tech, FinTech, and B2B SaaS domains.

CORE TECHNICAL SKILLS

Generative AI / LLM	LLM Integration, Prompt Engineering, RAG Systems, LangChain, Conversational AI, OpenAI API, Groq, Hugging Face, Fine-tuning
ML / NLP	NLP, Text Classification, Sentiment Analysis, TensorFlow, MLOps, MLflow, Model Evaluation, Production ML Pipelines
Vector & Data	ChromaDB, Pinecone, Vector Databases, Embeddings, Semantic Search, MySQL, PostgreSQL, Redis, Firebase
Backend	Python, FastAPI, Node.js, TypeScript, REST APIs, WebSockets, Hapi.js, Microservices, System Design
Frontend	React.js, Vue.js, AngularJS, JavaScript
Cloud	Azure (AD, ML, DevOps, SSO, ADFS, App Services) · GCP (Pub/Sub, Firebase, API Gateway) · AWS (EC2, S3, Lambda)
DevOps & Infra	Docker, Kubernetes, Docker Swarm, CI/CD, Jenkins, GitHub Actions, Linux, Nginx, Server Provisioning
Compliance	SOC 2 Type II, CyberCube Certified, VPAT, VAPT, IP Policy Drafting, Audit Coordination
Integrations	Azure AD, ADFS, SSO, SAML, Microsoft Teams, Enterprise Identity Providers, OAuth 2.0

CERTIFICATIONS & COMPLIANCE

SOC 2 Type II — Lead engineer, policy drafting, audit coordination, VAPT execution. Achieved single low-severity Nginx finding.

CyberCube Certified — Cyber risk analytics certification for enterprise and BFSI client onboarding.

VPAT Compliance — Accessibility certification enabling enterprise procurement approvals.

PROFESSIONAL EXPERIENCE

Senior ML & Full-Stack Engineer / Tech Lead

W.E. Matter — TheOther 2 Thirds Consulting LLP

Apr 2023 – Present

Mumbai, India

- Built KYARA — a production Generative AI platform for HR intelligence featuring RAG-based policy Q&A, conversational employee intelligence, and adaptive survey engine using LLMs, LangChain, ChromaDB, FastAPI, and Prompt Engineering — deployed across 10+ enterprise clients.
- Architected and shipped an enterprise-grade employee engagement SaaS platform serving clients across India and the Middle East — contributing to 2x YoY revenue growth over 2.5 years.
- Led SOC 2 Type II certification end-to-end across 12 months — policy drafting, VAPT execution, vendor assessments, and audit documentation — achieving single low-severity finding out of full infrastructure scan.
- Achieved CyberCube cyber risk certification and VPAT accessibility compliance independently — unlocking BFSI and enterprise client segments worth significant ARR.
- Executed Azure AD and ADFS SSO/SAML integration for 5+ enterprise clients — enabling seamless identity federation and zero-friction employee login across client environments.
- Owned full DevOps infrastructure for 8+ production applications — containerised stack using Docker Swarm and Docker Compose, managed CI/CD pipelines, Linux server administration, and Nginx configuration.
- Led AWS to Azure cloud migration for all production systems — completed in 15 days with zero downtime and 30% improvement in infrastructure cost efficiency.

- Designed and delivered a Performance Management System (PMS) for NBFC clients and led product roadmap as Technical Product Manager across full engineering team.

Software Engineer — Full Stack & DevOps

Feb 2022 – Mar 2023

BizPilot.in

Delhi (Remote)

- Led complete ground-up redesign and development of V2 platform — React.js frontend, Node.js backend, PostgreSQL database, deployed on AWS.
- Built financial automation engine reducing compliance processing time by 200% — handling 1,000+ automated transactions per month.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions; managed all production server infrastructure independently.

Software Engineer — Cloud Migration

Sep 2021 – Feb 2022

Raykor Technologies

Mumbai, India

- Executed full Azure to GCP cloud migration for Intellinotion client systems serving 50,000+ users — zero downtime maintained throughout 3-month migration window.
- Built secure REST APIs using Hapi.js with Firebase authentication; automated deployments and optimised infrastructure stability by 40%.

Software Engineer — Platform & ML

Aug 2019 – Aug 2021

Nexsales Corporation

Mumbai, India

- Led development of new dialer product — Vue.js microservices platform integrated with SIP servers, serving 200+ sales agents daily.
- Designed ML pipelines using Python and TensorFlow for text classification — achieving 87% accuracy on lead qualification models.
- Sole infrastructure owner — managed server provisioning, database architecture, tech stack selection, DevOps operations, and pub/sub systems on GCP.
- Modernised legacy Node.js 0.10 systems to Node.js 14 — eliminating 3 critical security vulnerabilities and improving response time by 60%.

EDUCATION

B.E. in Information Technology

2015 – 2019

Bharati Vidyapeeth College of Engineering, Navi Mumbai

WHY HIRE ME

- Only engineer in my peer group to independently lead SOC 2 Type II + CyberCube + VPAT — three enterprise compliance certifications simultaneously
- Built and shipped production Generative AI / RAG systems before most engineers started experimenting with them
- Multi-cloud operator — Azure (deep), GCP, AWS — rare combination at senior engineer level
- Zero-downtime migrations and single low-severity audit finding — measurable reliability track record
- 6.7 years of startup ownership: from architecture design to client delivery, with no hand-holding
