# MANISH UKIRADE

## AI/ML Engineer | Generative AI, RAG, Agentic Systems & MLOps

Thane, India | +91 86919 83106 | ukirademanish9797@gmail.com | manishukirade.com | LinkedIn | GitHub

## PROFESSIONAL PROFILE

Hands-on AI/ML engineer with 7+ years of production engineering experience across Generative AI, RAG, governed AI Chief of Staff workflows, machine learning, secure automation, enterprise SaaS, and cloud platforms. Owns end-to-end delivery from architecture and implementation through evaluation, deployment, observability, and reliability across Azure, GCP, and AWS.

## TECHNICAL SKILLS

**Generative AI:** RAG, LangGraph, LangChain, MCP, ChromaDB, embeddings, semantic search, prompt engineering, OpenAI API, multi-agent orchestration, human-in-the-loop workflows, Promptfoo evaluations

**ML & Data:** TensorFlow, CatBoost, NLP, text classification, sentiment analysis, feature engineering, MLflow, model evaluation, pandas, MySQL, PostgreSQL, Redis

**Backend:** Python, FastAPI, Node.js, TypeScript, Fastify, Hapi.js, REST APIs, WebSockets, microservices, JWT, system design

**Frontend:** React.js, Vue.js, JavaScript, TypeScript, responsive interfaces, data visualization, accessible UX

**Cloud & DevOps:** Azure, AWS, GCP, Docker, Kubernetes, Docker Swarm, CI/CD, Jenkins, GitHub Actions, Linux, Nginx

**AI Safety & Security:** AI safeguards, prompt-injection defence, evidence allowlists, human approval, RBAC, tenant isolation, privacy thresholds, audit trails, idempotent writes, SSRF controls, OWASP testing

**Enterprise:** Azure AD, SSO, SAML, OAuth 2.0, Microsoft Teams, SOC 2 Type II, VAPT, VPAT

## PROFESSIONAL EXPERIENCE

### AI/ML Engineer

***Mar 2026 - Present***

**W.E. Matter - TheOther 2 Thirds Consulting LLP** Mumbai, India

- Built KYARA Chief of Staff, a governed system of 16 versioned specialist agents that combines engagement, goals, workload, policy RAG, coaching knowledge, reasoning, rehearsal, and multilingual response delivery.
- Implemented AI safeguards in code: tenant, role, and team scoping; minimum-five-response privacy thresholds; blocked raw comments and aggregate-to-individual inference; evidence and tool allowlists; and prompt-injection-resistant retrieval.
- Governed every write with exact-draft approval, hash and TTL validation, Redis-backed checkpoints, idempotent outbox delivery, audit traces, and fact-only fallback replies after reviewer failures.
- Validated the safety classifier on 177 cases at 99.4% overall accuracy, 100% threat-and-abuse recall, and 0% false positives across 62 frustration, quotation, and fair-management cases.
- Added multilingual fixed-text delivery using Azure Translator with a versioned translation-agent fallback, preserving names, contacts, links, numbers, and approved content; integrity failures fall back to English.
- Built KYARA's production RAG policy Q&A and conversational employee-intelligence platform using Python, FastAPI, LangChain, ChromaDB, and LLM prompting for 10+ enterprise clients.

### Tech Lead

***Apr 2023 - Feb 2026***

**W.E. Matter - TheOther 2 Thirds Consulting LLP** Mumbai, India

- Shipped enterprise platform improvements across survey scorecards and reporting, HRMS attendance connectors, Microsoft Teams Adaptive Cards and bot security, and WhatsApp queue reliability.
- Architected a multi-tenant employee-engagement SaaS platform for clients across India and the Middle East, contributing to 2x year-over-year revenue growth over 2.5 years.
- Led SOC 2 Type II, CyberCube, and VPAT programs end to end; owned policy drafting, VAPT, vendor reviews, evidence, and audit coordination with one low-severity Nginx finding.
- Owned infrastructure for 8+ production applications and completed the AWS-to-Azure migration in 15 days with zero downtime and a reported 30% cost-efficiency improvement; delivered SSO/SAML integrations for 5+ clients.

## EARLIER EXPERIENCE

### Software Engineer - Full Stack & DevOps
***Feb 2022 - Mar 2023***

**BizPilot.in** Delhi, Remote

- Led the ground-up V2 rebuild using React, Node.js, PostgreSQL, and AWS, taking the platform from architecture through production deployment.
- Built a financial-automation engine processing 1,000+ monthly transactions and reducing compliance-processing time by a reported 200%.
- Implemented Jenkins and GitHub Actions CI/CD and independently managed production infrastructure and releases.

### Software Engineer - Cloud Migration
***Sep 2021 - Feb 2022***

**Raykor Technologies** Mumbai, India

- Migrated Intellinotion systems serving 50,000+ users from Azure to GCP with zero downtime across a three-month delivery window.
- Built secure Hapi.js REST APIs with Firebase authentication, automated deployments, and improved infrastructure stability by a reported 40%.

### Software Engineer - Platform & ML
***Aug 2019 - Aug 2021***

**Nexsales Corporation** Mumbai, India

- Led development of a Vue.js microservices dialer integrated with SIP systems and used by 200+ sales agents each day.
- Built Python and TensorFlow text-classification pipelines reaching 87% accuracy for lead qualification.
- Owned GCP infrastructure, server provisioning, database architecture, CI/CD, and pub/sub systems; modernized Node.js 0.10 services to Node.js 14, removing three critical vulnerabilities and improving response time by 60%.

## SELECTED SYSTEMS & RECENT WORK

- KYARA Chief of Staff: 16 versioned specialist agents, evidence-grounded manager guidance, privacy and sensitive-HR safeguards, exact-draft approval, idempotent APS writes, reviewer fallback, and measured safety evaluations.
- Tiknod - Personal: Built a local-first AI-assisted SEO delivery platform for WordPress, Next.js, React, and Git; the AI drafts only, while authorised people control version-bound approval, idempotent publishing, public verification, audit receipts, and rollback.
- Tiknod safeguards include RBAC, PostgreSQL row-level tenant isolation, append-only audit history, encrypted secrets, SSRF and DNS-rebinding protection, redirect credential stripping, rate limits, conflict checks, and an emergency stop.
- Linux VAPT Agent - Personal: Built a local-first multi-agent security assistant with strict authorized scope, read-only audit defaults, guarded commands, route and TLS checks, CISA KEV/NVD intelligence, and Word/PDF reports.
- Production ML: Employee-attrition modeling with CatBoost, 122 engineered features, 83.48% accuracy, and 82% recall for at-risk employees.

## LEADERSHIP & PRODUCT OWNERSHIP

- Designed and delivered a Performance Management System for NBFC clients and owned the product roadmap as Technical Product Manager across the engineering team.
- Turns enterprise requirements into end-to-end releases spanning product architecture, AI, frontend, backend, cloud operations, security, compliance, and client integrations.

## EDUCATION

### B.E. in Information Technology
***2015 - 2019***

**Bharati Vidyapeeth College of Engineering** Navi Mumbai, India
